

The EFNUDAT Project

Start date: 1/11/2006

Duration : 4 years

Total Budget: 3.03 M€

EC Contribution: 2.4 M€

The EFNUDAT Consortium

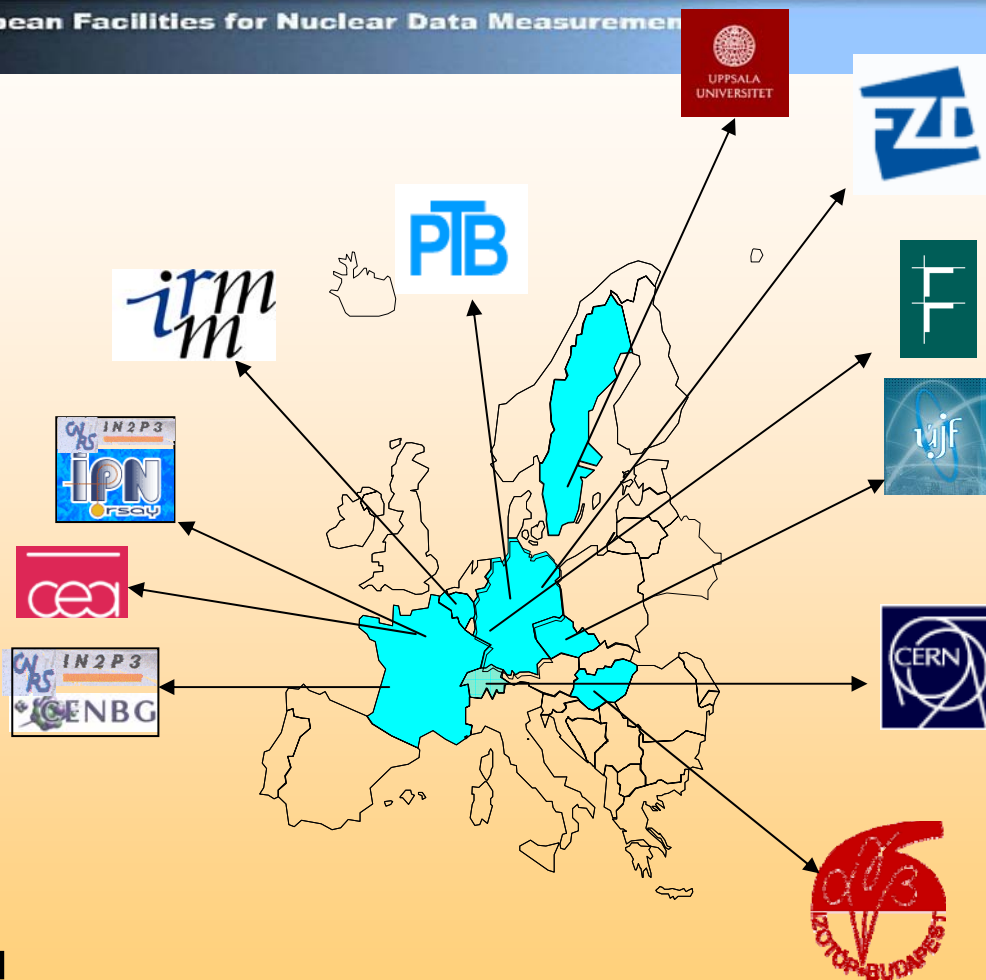

10 partners- 9 facilities

4000 hours for external users

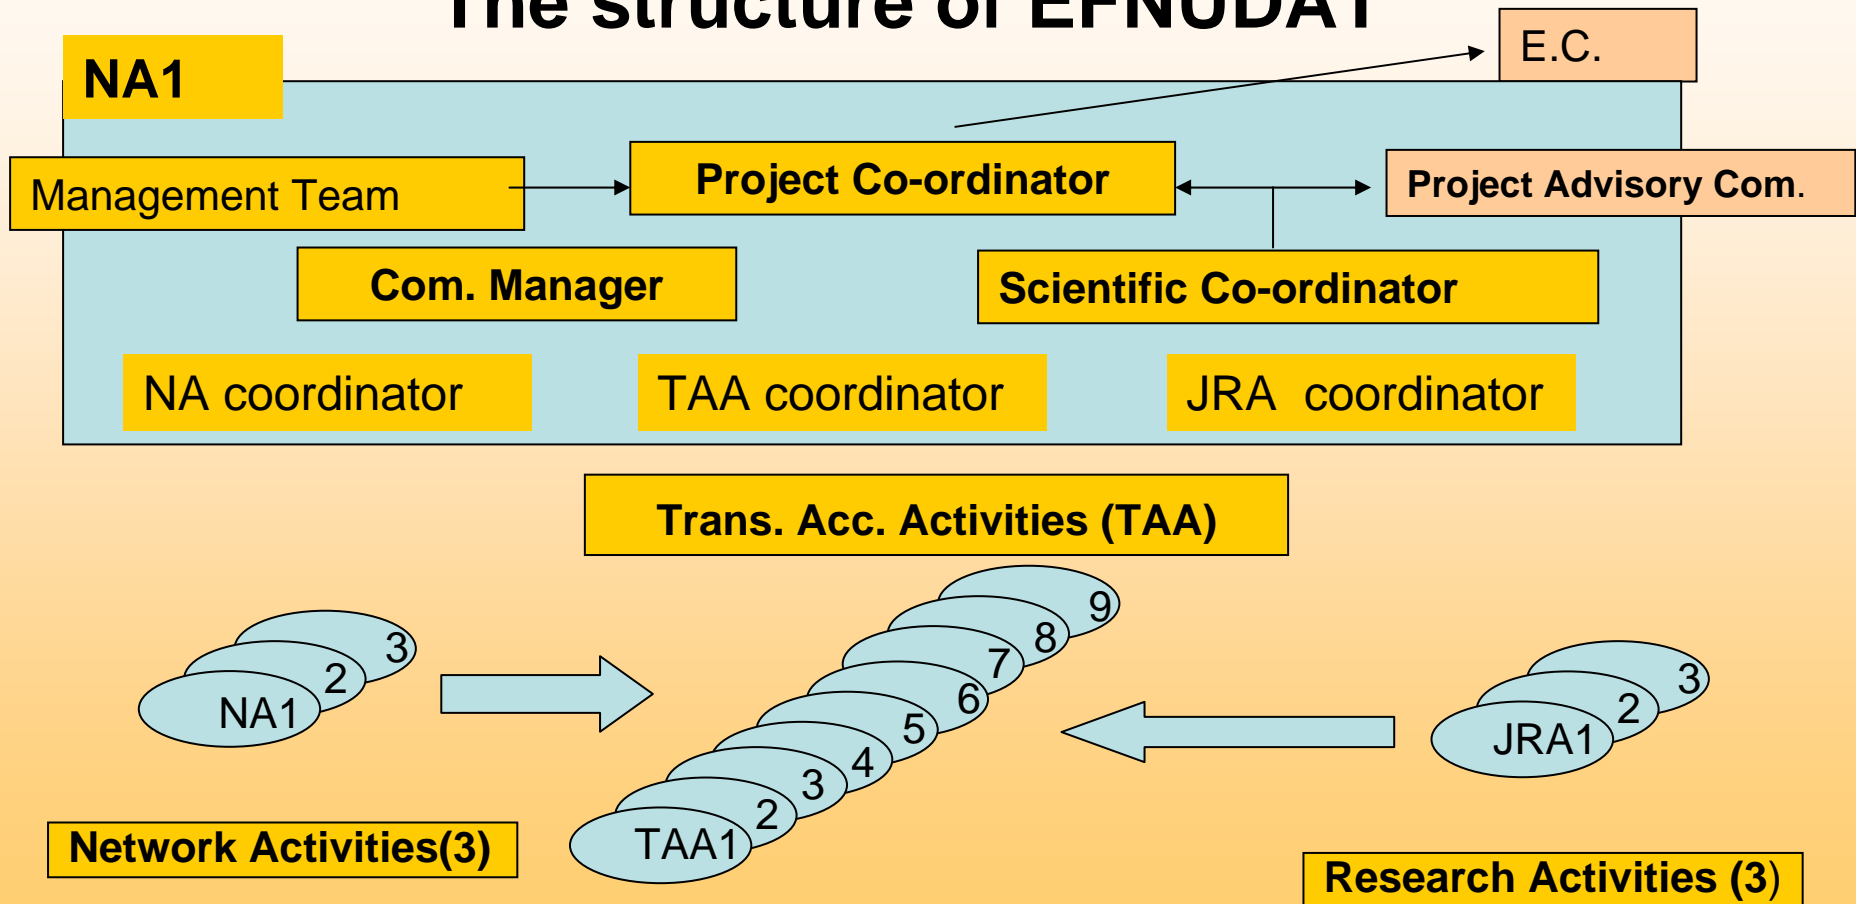

Web-site: www.efnudat.eu

Project Coordinator: G. Barreau

Scientific Coordinator: F. J. Hamsch

The structure of EFNUDAT

Network activity (NA1) Main Objectives

- The Management Board (NA 1) covers the overall management of the project and It organises the integration of all activities, monitor their progress and guide corrective actions.
- Starting point for a sustainable cooperation between all partners, beyond the duration of the present project.

Summary of the activities and major achievements

The EFNUDAT project in its first year of activity is well on its way

Start and presentation of the project:

The Kick-off meeting (11-12 January 2007 at FZ Karlsruhe).

The consortium management board (MB) is in charge of the overall management duties (administrative and financial aspects).

(support of the CNRS administration)

**The project manager has distributed :
to the partners the funds corresponding to the
18 first months of the project.**

**the required funds to the facilities (user fees)
and external users of the facilities.**

- **Key Performances Indicators have been defined.**
- **A Communication Action Plan has been established.**
- **A report on the assessment of the dissemination activities during the first year has been prepared .**

- **Key Performance Indicators (KPI)**

A list of indicators to measure the progress and success of the project.

13 indicators have been identified...

- **NA_KPI3**: Number of participants to scientific meetings organized by EFNUDAT: Several meetings will be organized by EFNUDAT partners. The number of participants should be an indicator of the EFNUDAT impact on the Nuclear Data community.

- **TAA_KPI 2**: 'At least 50% of the users supported by the project must be first-time users';

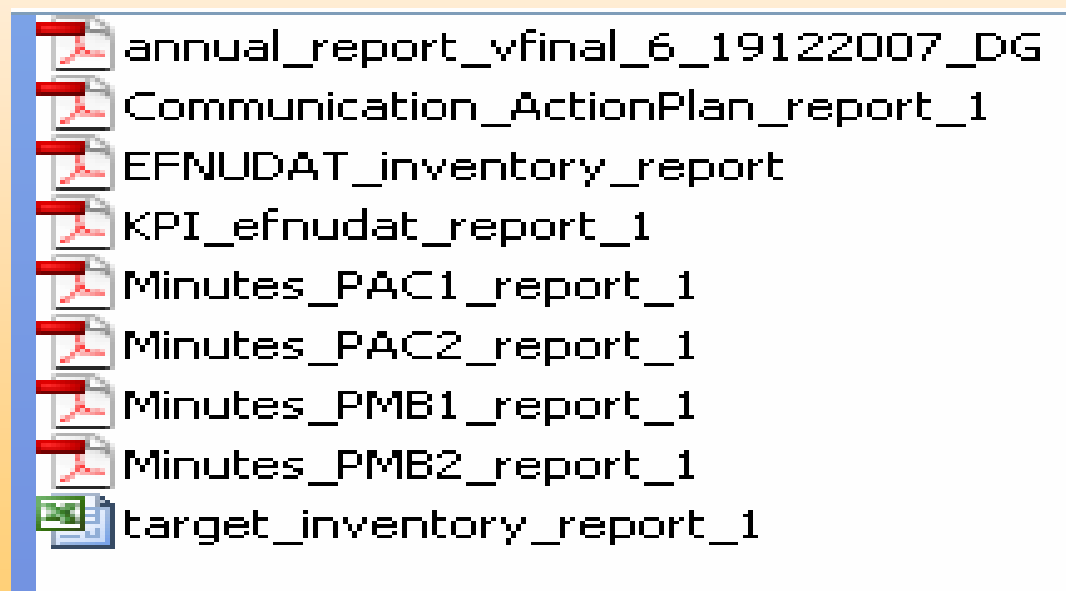

The EFNUDAT web site has been taken into regular operation. The web site has in a short time attracted a large number of visitors (more than 1000 at the end of October 2007).

Several international conferences have been used to spread the word about EFNUDAT and the possibilities within its TAA and scientific visitor activities.

All the expected deliverables within the NA activities have been delivered. They are available on the EFNUDAT website (www.efnudat.eu).

- First EFNUDAT annual report.
December 2007

Date	Title/subject of meeting	Location	Number of attendees	Website address
11-12/1/2007	EFNUDAT Kick-off	Karlsruhe	27	http://nuclear-astrophysics.fzk.de/efnudat
